

**REMARKS**

The specification has been amended to correct obvious typographical errors. Specifically, the general structural formula (1) in Table I spanning pages 35-44 of the specification has been amended to fix the position of the  $(R^4)_n$  group to position 8 of the aromatic system. Table I has also been amended to indicate that  $R^2$  is hydrogen. Finally, the general structural formula has been renamed formula 1A. Support for this amendment can be found, for example, in Examples 1-61 on pages 55-97. In each example, the compound is named with the  $R^4$  group at the 8-position of the aromatic system and a hydrogen atom at the  $R^2$  position. No new matter has been added.

Entry of this amendment is respectfully requested.
